

# Naveen Nandharam

## Senior Front End Developer

Crafting digital experiences that resonate and perform is what I live for. With over a decade of hands-on experience, I've had the privilege of building and launching more than 100 websites, web apps, and mobile apps. My journey has taken me from understanding client needs and selecting the perfect tech stack to designing intuitive user experiences and developing robust systems. I'm well-versed in a range of technologies, including HTML, CSS, JavaScript, React, and more, and I've mastered tools like WordPress, Drupal, and AI tools like ChatGPT.

My passion lies at the crossroads of creativity and technology. Co-founding a digital agency gave me invaluable insights into leading teams and delivering results that truly matter. With a background in digital marketing, I've learned to create experiences that aren't just functional but also engaging and impactful. I'm always ready to embrace new challenges and bring innovative ideas to life.

## Experience

### OutworX Corporation, Remote

Front End Developer.

September 2023 - Present (Contract - Remote)

As a Senior React Developer, I lead the team in tackling complex frontend tasks using React. I take business needs and turn them into effective applications. I also help junior developers learn and grow, make sure our code meets high standards, improve performance, connect with other services through APIs, make sure our designs work well on different devices

**Project:** OSP-Maxis

**Project Description:** Developed an automated platform for the "OSP FTTH SLA Tracking" project to streamline and enhance deliverable milestone monitoring. The system replaces manual tracking with an End-to-End (E2E) solution, enabling validation and approval of work completion for OSP FTTH Deliverable Releases (DRO). Key features include automated milestone tracking, vendor submission of Extension of Time (EOT/QCD) requests, and calculation of Liquidated Damages (LD) for unmet KPIs.

**Tech Stack:** React, Parcel, Tailwind, RestAPI & Javascript, RxJs, Accessibility

### Pinnacle Consultancy Sdn Bhd, Kuala Lumpur, Malaysia.

Front End Developer.

July 2019 - May 2023 (Contract - Remote)

As a Front End Developer specialised in React and Angular, my role involves crafting intuitive user interfaces, integrating APIs, and optimising web performance. By utilising React.js, JavaScript (ES6+), HTML5, CSS3, Redux, React Router, Angular, TypeScript, RxJS, and Angular Router, I ensure seamless user experiences and efficient application functionality.

**Project:** Maxis - CMS (Contract Management System - OSP)

**Project Description:** Vendor Contract Management System simplifies the management of vendor contracts for telecom companies. With streamlined processes for contract creation, tracking, and compliance, it enhances vendor relationship management and ensures efficient operations.
